Career Objectives:

I am a results-driven mathematician, statistician, and full stack developer who thrives on creating innovative technology solutions. My expertise spans multiple industries where I combine analytical thinking with hands-on software development to tackle complex challenges. I've successfully implemented systems that make a real difference—from developing a comprehensive HR Portal Management System at Access Bank to revolutionizing administrative processes at an educational institution. I excel at leading technical teams and am committed to continuous learning, as evidenced by my recent certifications in cloud technologies and IT service management. My passion lies in harnessing data-driven insights to improve efficiency and drive growth, particularly in fintech, data science, and artificial intelligence. I'm eager to apply my diverse skill set in an environment where I can continue growing while making meaningful contributions at the intersection of STEM disciplines.

Work Experience & Key Accomplishments: sequential order

Date: May 2024 - Present

Position: Team Member, UI/UX Team

Organization: Access Bank PLC

Key Accomplishment: As a key frontend developer in JavaScript/TypeScript with expertise in major frameworks, I have hit the ground running by playing a pivotal role in developing the **HR Portal Management System (HR PMS)**—a bank-wide solution for human resource management—while leveraging strong problem-solving and people skills to collaborate across departments, bridge knowledge gaps through continuous learning and certifications (**ITILv4 ITSM, AZ-900**), and enhance both **software engineering and banking operations** within the dynamic fintech industry.

Date: January 2024

Position: Junior Administrator, Mathematics Specialist and Teaching Staff

Organization: Covenant Grace International School, Elekehia, Port Harcourt, Rivers State.

Key Accomplishment: I spearheaded the implementation of an innovative **electronic School Management System**, revolutionizing administrative efficiency, while also **re-engineering the mathematics curriculum** to enhance student performance and engagement—an achievement that not only secured my retention within the organization but also earned me a promotion from an entry-level to a mid-level role.

Date: October 2023

Position: Backend Software Developer (Intern)

Organization: Hotels.ng (HNG), Lagos. (remote)

Key Accomplishment: During my backend software development internship with HNG, I achieved significant success by earning the ultimate accolade of being selected as one of the 300 finalists out of an initial 22,000 interns in the program as well as spearheading a 5-man team of backend developers in various API development sprints for projects assigned by the organizers.
